1 The procedure to install GIMP on Ubuntu Linux OS

1. To follow the installation procedure, you need to be connected to the internet.
2. You must have `Synaptic Package Manager` installed on your machine.
3. If not installed, please install `Synaptic Package Manager` using `Ubuntu Software Center`.

1.1 The procedure to install `GIMP`

1. On Ubuntu 11.04 and higher,
   (a) Press the `Window` key on your keyboard to open `Dash Home`.
   (b) Type `Synaptic Package Manager`.
   (c) Click on the `Synaptic Package Manager` option.
2. Enter your password.
3. Click on `OK`.
4. In the search box type `GIMP`.
5. Click on the `GIMP` check box and click on `Mark for Installation`.
6. Click on `Mark`.
7. Finally, click on `Apply`.
8. Again, click `Apply` for installation.
9. The installation will take a few minutes depending on your internet speed.

1.2 The procedure to install `GIMP` via `Terminal`

1. Open the terminal by pressing `Ctrl + Alt + T` keys together.

2. Now in the terminal type `sudo apt-get install gimp` and press `Enter`.
3. Enter the system password if required.
4. It will display how much has to be downloaded from the internet and how much disk space will be occupied.
5. Type `y` and press `Enter` to confirm this.
6. This will install GIMP.

1.3 The procedure to check `GIMP installation`

1. Open the terminal.
2. Now in the terminal type `gimp` and hit `Enter`.
3. This will open the `GIMP interface`.

2 The procedure to install GIMP on Windows OS

1. Go to the website http://www.gimp.org/downloads/.
2. Go to the section `GIMP for Windows` and download the latest `GIMP version.no Installer`.
3. Double-click the downloaded file to run it.
4. Follow all the instructions to install `GIMP`.
5. Once the installation is completed successfully, you can open `GIMP`.
6. To open `GIMP`, click on `Start` menu, click on `All programs` and then on `GIMP`.
